

1. Based on this question in the RFP narrative:

*Describe key staff members' length of service, education and relevant work experience. Describe staff qualifications to deliver your proposed design and your understanding of the State's staff integration initiative.*

Is this in reference to the possibility that the contractor will be have functional supervision of state staff in the WorkOne center?

A: The question refers to the contractors key staff work history with the contractor, key staff education, and key staff work experience in workforce development and how that experience will allow them to deliver the proposed plan from the contractor.

The second part refers to the contractors staff qualifications to deliver on their proposal. In addition, what is the contractors understanding of staff integration and formal vs. functional supervision? Staff integration and functional vs. formal supervision has been expected in WorkOne offices (AJCs) for a number of years.
